### FEATURED PROJECTS

#### THESAURUS - REX

Built with JS, React / JSX, Node.js, CSS, Bootstrap and a free synonym API. The user inputs a word and an animated T-Rex tells you a list of synonyms. [juliehawn.com](http://juliehawn.com)

#### SAN DIEGO JAVASCRIPT APP

Built with JS, React Native / Redux, MongoDB, Loopback, Stripe API. Made improvements and additions to a mobile app for the local JavaScript Meetup group. I specifically created the donation feature which captures credit card information through a form and then utilizes the Stripe API to charge the card. I also fixed the sign up feature to alert a user if the email already exists in the database.

#### ORIGIN CODE ACADEMY PORTAL

Built with JS, React / Redux, Bootstrap, Node.js, MongoDB, Loopback. Collaborated with a team to enhance a Hired.com for coding academy graduates and employers. My contribution included creating an edit and delete feature for work and education history that allowed users to change their profile and update the profile in the database.
